

Haraan
PARTNER PLATFORM

— FEATURE GUIDE · 2026

Your dashboard, every option explained.

A guided walk-through of the Haraan Partner Console — what each menu item does, what you can do on every screen, and how the pieces fit together to run your events and venues end to end.

01 Signing in & the sidebar map

02 Dashboard & live KPIs

03 Events lane — create & sell

04 Event analytics, desk & gate

05 Venues lane — bookings

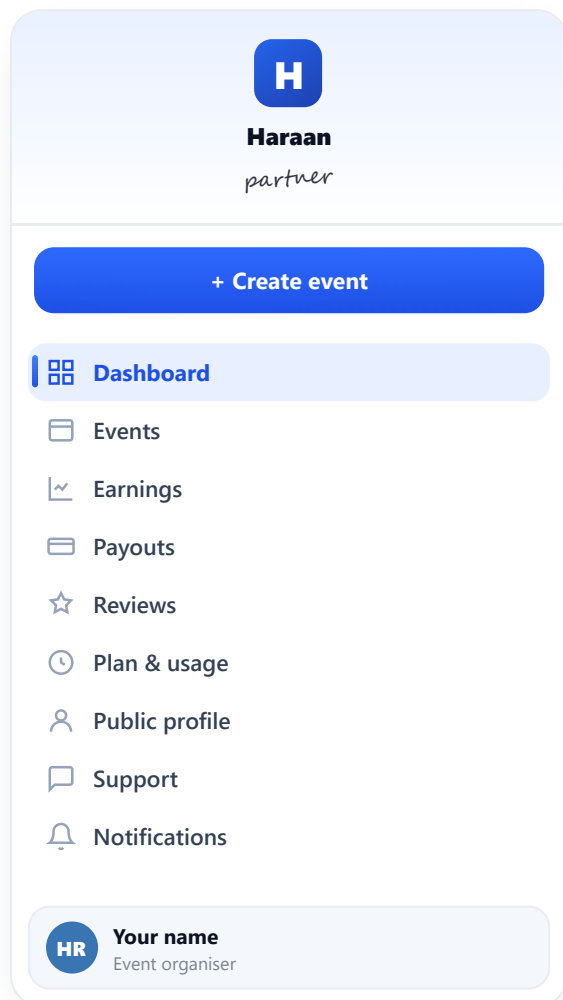

06 Earnings, Payouts & Reviews

07 Profile, plan & support

08 Quick reference

Sign in, then meet your sidebar

Open haraan.app/partner and sign in the way that suits you — phone OTP, Google, or email & password. Your console is **lane-aware**: event organisers see the Events tools, venue owners see the Play/venue tools. Everything else is shared.

Create event / Add venue

A lane-aware button pinned to the top — your fastest path to publishing something new.

Dashboard

Your home screen: today's earnings, live KPIs, charts and quick actions, filtered by period.

Events / Venues

Manage your listings — create, edit, and open each one's analytics, tickets and bookings.

Earnings

A running ledger of every rupee earned, with day-by-day breakdowns.

Payouts

Your balance, settlement bank account, and the history of every payout batch.

Reviews

What customers are saying — a live feed with rating filters and per-event scores.

Plan & usage

Your subscription tier and how much of it you've used this cycle.

Public profile

Your shareable brand page at haraan.app/host — edit identity, branding & links.

Support • Notifications • Your profile

Get help from the AI assistant, read alerts, and manage your photo & password.

Lane-aware by design. If you're an event organiser you'll see **Events**; if you own a venue you'll see **Venues / GameHub**. The console only shows the tools relevant to you — nothing to switch off.

Dashboard

The first thing you see. A live command centre that answers "how am I doing?" at a glance — then lets you drill in. Use the **period pill** (top-right) to switch every figure between today, this week, month, or a custom range.

Earnings hero & KPI strip

Top of Dashboard

BOTH LANES

A bold "today's earnings" card leads the page, followed by accented KPI tiles for the metrics that matter.

- Today's / period earnings with trend vs. previous
- Gross revenue and net after fees
- Tickets sold & bookings taken
- Attendees checked in

Money-by-day & performance charts

Dashboard widgets

BOTH LANES

Visual widgets turn raw numbers into direction — so you spot momentum while there's still time to act.

- Daily earnings trend chart
- Traffic sources & peak hours
- Booking funnel (views → checkout → paid)
- Organiser score & "needs attention"

Recent bookings & quick actions

Dashboard widgets

BOTH LANES

A live feed of the latest sales, plus one-tap shortcuts to the things you do most.

- Latest bookings with buyer & amount
- Jump to create, analytics or check-in

Period filter

Real-time

Mobile-optimised

On mobile the whole dashboard tightens into an app-like layout: the earnings hero sits up top, KPI cards stack, and a search icon expands into a full-width bar. Everything you get on desktop, sized for your phone.

Events

Everything to publish an event and sell it out. Hit + **Create event** for the guided wizard, or open any event to edit it. Each event carries its own tickets, coupons, gallery, FAQs and analytics.

Create-event wizard

+ Create event

EVENTS

A streamlined 5-step wizard with a live card preview and an AI-assisted description draft, so a polished listing takes minutes.

- Basics, date/time & venue with map
- Category, language, age & "Good to know"
- Poster + managed gallery
- Per-event FAQs

Ticket Studio

Event create & edit

EVENTS

A District-style ticket builder — design as many tiers as you need, each with its own price, capacity and availability window, plus optional per-event time-slots and fees.

- Multiple tiers (VIP, early-bird, general...)
- Per-event time-slots
- Per-tier price, capacity & sale window
- Booking fee & tax handling

Editable anytime

Slots

Fees

Coupon Studio

Event create & edit

EVENTS

A guided 6-step builder for promotions. Every rule you set is enforced automatically at checkout.

- Percentage or flat discount
- Minimum order value
- Usage cap & per-customer limit
- Expiry date & time

Gallery, FAQs & "Good to know"

Event edit · Extras

EVENTS

Everything that makes a listing feel complete and answers buyer questions before they ask.

- Managed photo gallery (separate from the poster) · repeatable FAQ accordion · admin attributes for language, age, kids & layout · real terms & conditions

Event analytics, desk & gate

Open any event's **Analytics** page — a workspace to watch sales, register walk-ins, control availability, and check people in on the day.

Per-event analytics

Events → open event → Analytics

EVENTS

A dedicated dashboard for a single event — sales pace, check-in progress, and revenue split by ticket tier.

- Tickets sold & revenue over time
- Check-in progress & no-shows
- Revenue-by-tier breakdown
- Downloadable event report

Desk registration + payment

Event Analytics hero

EVENTS

Register a walk-in and take payment on the spot — right from the event's hero. The booking flows into the same system as online sales.

- Name, phone & email
- Editable amount
- Pick tier & quantity
- Settle by cash or Razorpay

Gate check-in scanner

Events → Ticket check-in

EVENTS

Scan each ticket's QR at the door. Codes validate against your records so no pass is used twice.

- Camera QR scan (html5-qrcode)
- Live checked-in count
- Resolve-by-code, host-gated
- Duplicate & invalid rejection

Sold-out toggle & event history

Event hero · Events → History

EVENTS

One switch to signal "sold out" to buyers across web & app instantly — and a full archive of everything you've run.

- Mark sold out (blocks new bookings, shows the badge everywhere) · History page listing every past event with sold count, revenue, date & a View-report link

Venues & GameHub

If you run a turf or court, this is your lane. Add a venue, define its courts, and manage day-to-day bookings on a live grid — online and offline in one place.

Add & manage venues

+ Add venue

VENUES

List your venue with real photos, location, hours, pricing and rules — the same premium detail page customers browse in the app.

- Photos, map location & hours
- Price chart & rules
- Multi-sport support with icons
- Show-in-map & favourites

Courts & day-bookings grid

Venue → Day bookings

VENUES

Every court is a sport-aware unit with its own price. A live day slot-grid shows what's booked and lets you manage it hands-on.

- Per-court, per-hour grid
- Cancel a slot
- Add offline (walk-in) bookings
- Close a day · auto conflict-check

No double-booking

Offline + online

Venue analytics

Venue → Analytics

VENUES

The levers that lift occupancy and loyalty, per venue.

- Revenue & utilisation
- Repeat customers
- Peak days & hours
- Rating trends

One console, two lanes. Whether you sell tickets, rent courts, or both, Earnings, Payouts, Reviews and your Profile work identically — so the rest of this guide applies to everyone.

Earnings, Payouts & Reviews

Three sidebar items that keep you on top of what you've made, when you get paid, and how customers feel.

Earnings

Sidebar → Earnings

BOTH LANES

A running ledger of every rupee, with stats up top and a day-by-day breakdown below — the source of truth behind the dashboard hero.

- Total & period earnings stats
- Line-by-line ledger
- Daily earnings history
- Gross vs. net after fees

Payouts

Sidebar → Payouts

BOTH LANES

See what's available to withdraw, tell us where to send it, and follow each settlement through to your bank.

- Available balance
- Batch payout history
- Settlement bank account
- Clear, auditable status trail

Reviews

Sidebar → Reviews

BOTH LANES

A live feed of what customers say. Filter by rating to zero in on delight — or on what needs fixing.

- Venue review feed
- Aggregate event ratings
- Rating-distribution filter
- Newest-first, per listing

Profile, plan & support

The tools that represent you, keep you subscribed, and help when you're stuck.

Public profile

Sidebar → Public profile

BOTH LANES

Your free, shareable brand page at haraan.app/host/<you> — one link that shows your identity and all your events.

- Public name, page address & tagline
- Website & social links
- Logo, cover image & about
- Make public + "Open public page"

Plan & usage

Sidebar → Plan & usage (Beta)

BOTH LANES

Your subscription tier and how much of its allowance you've used this cycle — including add-ons like messaging automation.

- Current plan & entitlements
- Usage meter for the cycle

Support (with AI assistant)

Sidebar → Support

BOTH LANES

A support center with a built-in Claude-powered assistant that answers partner questions instantly, plus a route to the human team.

- Ask the AI assistant anything
- Escalate to the Haraan team
- Guides & common answers
- Available around the clock

Notifications & Your profile

Sidebar → Notifications · profile menu

BOTH LANES

Stay in the loop and keep your account yours.

- Notifications inbox for alerts & announcements · Your profile: change photo & password (name, email & phone are set by the Haraan team for your security) · quiet sign-out from the sidebar

Every option, one glance

Bookmark this page. Each sidebar item and what it's for.

+ Create	Publish a new event or add a venue — lane-aware.	Dashboard	Live earnings, KPIs, charts & quick actions.
Events	Create/edit, Ticket & Coupon Studio, analytics.	Venues	Courts, day-booking grid & venue analytics.
Earnings	Ledger & day-by-day earning history.	Payouts	Balance, settlement account & batches.
Reviews	Customer feedback with rating filters.	Plan & usage	Subscription tier & cycle usage.
Public profile	Your brand page at haraan.app/host.	Support	AI assistant + the Haraan team.
Notifications	Alerts & announcements inbox.	Your profile	Photo & password; quiet sign-out.

Sign in

Phone OTP, Google, or email & password at haraan.app/partner.

Web + App

Manage from desktop or your phone — the console is fully responsive.

Need help?

Open Support and ask the AI assistant, any time of day.
